MANUAL**

ATTENTION

THIS BOOKLET

The safety warnings in this booklet are important. By understanding the dangers inherent in the use of any firearm, and by taking the precautions described herein, you can enjoy complete safety in the use of your Taurus firearm. Failure to heed any of these warnings may result in serious injury to you or others, as well as severe damage to the firearm or other property.

1. SAFETY PRECAUTIONS

PISTOLS are classified as FIREARMS or DANGEROUS WEAPONS and are sold by us with the specific understanding that we are not responsible in any manner whatsoever for their improper or negligent handling or resale under local laws and regulations.

Taurus shall not be responsible in any manner whatsoever for malfunctioning of the firearm, or for physical injury or property damage, resulting in whole or in part from (1) criminal or negligent discharge, (2) improper or careless handling, (3) unauthorized modifications, (4) defective, improper hand-loaded, or reloaded ammunition, (5) neglect, or (6) other influences beyond our direct and immediate control. This limitation applies regardless of whether liability is asserted on the basis of contract, negligence or strict liability (including any failure to warn). Under no circumstance shall Taurus be liable for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits.

SAFETY WARNINGS NOT JUST FOR BEGINNERS

Regardless of your familiarity or experience with firearms, you need to study this manual.

The safe handling of firearms requires specialized training, discipline and caution. Firearms, by their nature and intended function, are deadly instruments. Accidental death or serious injury can result if they are handled improperly or carelessly.

Firearms rarely cause accidents. Firearms accidents almost always are caused by a failure to obey the basic rules of gun safety. Unfortunately, experienced shooters seem to violate these rules as frequently as beginners. Thus the basics of safe firearms handling cannot be repeated too often. Read, re-read and practice the basic principles of firearms safety until they become second nature: habits that you don't forget. If you have any question about your knowledge or ability to use this or any other firearm with complete safety you should seek supervised instruction. Personalized instruction is often available from firearms dealers, gun clubs, state hunter safety programs or police departments in the United States. If none of these sources is accessible, write to the National Rifle Association, 11250 Waples Mill Road, Fairfax, VA 22030 or at www.nra.org. THEY WILL ASSIST YOU.

A person with a firearm in his possession has a full-time responsibility. He must KNOW how to keep and use his firearm safely, and then must always TAKE the precautions necessary -all of them. He cannot guess; he cannot forget. This responsibility is his alone. It cannot be passed off to someone else. Remember: no firearm can be made accident-proof. A firearm is just a machine, with no judgement of its own. It responds to your actions, whether wise or foolish. The only truly effective safety device is the mind of a cautious shooter who never forgets that a moment's carelessness can produce permanent tragedy.

Firearms are not all alike

Many makes and models of firearms might LOOK nearly the same. However, they differ widely in design and operation, and in the location and function of various controls.

Study this manual thoroughly. Educate yourself on the characteristics and operation of your particular firearm before attempting to handle it. Do not permit others to handle it - unless they also have done so.

You should have an instruction manual for every firearm you own. If you do not, write the manufacturer and obtain one. Most manufacturers will gladly send you one free. If for any reason a manual is not available, visit your public library. Many books have been published which contain detailed information on obsolete or discontinued firearms.

Your knowledge can prevent injuries.

Taurus firearms are designed and made to offer maximum safety when correctly used. However, as with any other weapon, it is not foolproof, and may become very dangerous if the next basic recommendations are not RIGIDLY observed:

ATTENTION

WARNING: Pay special attention to the safety rules listed below.

NOTICE: Get instruction from a competent firearms instructor before using any firearm.

NOTICE: Never cock the firearm until you are ready to shoot.

DANGER: Never, never-ever point any firearm, loaded or unloaded, at anything you do not intend to shoot.

DANGER: Load and unload with the muzzle pointed in a safe direction.

DANGER: When receiving a firearm always check that it is unloaded (remove magazine and open slide to check if chamber is empty), even if you saw it done previously.

DANGER: Never put your hand over the muzzle of a firearm.

DANGER: Check ammunition to be sure it is the right size and caliber, and that it is not dented.

DANGER: WHILE HANDLING ANY FIREARM, NEVER ALLOW IT TO POINT AT ANY PART OF YOUR BODY OR AT ANOTHER PERSON. NO HARM SHOULD RESULT IF YOU OBEY THIS RULE, EVEN IF AN ACCIDENTAL DISCHARGE OCCURS.

DANGER: Don't try to change your firearm's trigger pull, because alteration of trigger pull usually affects sear engagement and may cause accidental discharge.

DANGER: Never engage a gun lock on a loaded firearm.

DANGER: This product is not intended for use by criminals, for use in the commission of crimes or for any other wrongful purpose. Such uses constitute a misuse of the product and have a high likelihood of serious bodily injury or death for the criminal, the wrongdoer, law enforcement officers and/or innocent bystanders.

CAUTION: If there is any reason to suspect that a bullet is obstructing the barrel, immediately unload the firearm and look through the bore. It is not sufficient to merely look in the chamber.

WARNING: Keep your finger off the trigger until you are actually aiming at the target ready to shoot.

WARNING: Be certain the firearm is unloaded before cleaning.

WARNING: Always empty firearms before entering a place where there are people.

WARNING: Don't test the safety by pulling the trigger while the safety is on unless you are absolutely sure the firearm is empty and you are pointing the muzzle away from everyone and in a safe direction.

WARNING: Never pull a firearm towards you by the muzzle. Don't climb a tree or cross a fence with a loaded firearm.

WARNING: Never carry any handgun in your pocket, purse or waist-band. Use a pistol case or proper holster with safety flap or strap.

WARNING: Old or reloaded ammunition may be dangerous. We recommend against using it.

WARNING: Always treat every firearm as if it were loaded.

WARNING: Do not shoot or handle firearms after consuming beer, wine, other alcoholic beverages, any medications or other drugs that may affect your ability.

SAFETY FIRST: Never leave a loaded firearm unattended.

SAFETY FIRST: Store firearms and ammunition separately beyond the reach of children.

SAFETY FIRST: Be sure of your target and backstop before you shoot.

SAFETY FIRST: If a firearm fails to fire when the trigger is pulled, keep it pointed at the target for at least 30 seconds. Sometimes slow primer ignition will cause a "hang" fire and the cartridge will go off after a short pause.

SAFETY FIRST: Never shoot at hard flat surfaces or water. Bullet may ricochet.

SAFETY FIRST: Use a proper bench or support and aim the gun only if you intend to shoot.

SAFETY FIRST: Dry firing is bad for this firearm, whether the hammer block is engaged or not.

SAFETY FIRST: Treat this firearm as a precision instrument.

SAFETY FIRST: Write to us concerning any items or circumstances which might relate to your safety and the operation of our products.

SAFETY FIRST: Use a proper holster and draw only if you intend to shoot.

SAFETY FIRST: The safety is only a mechanical device, not a substitute for common sense.

WARNING

Taurus Pistols were manufactured to perform properly with the original parts as designed. It is your duty to make sure any parts you buy are installed correctly and that neither replacements nor originals are altered or changed. Your firearm is a simple tool but it has many parts that must relate correctly to other parts. Putting a firearm together with wrong or modified parts can result in a damaged firearm, danger and injury or death to you and others through malfunction. Always have a qualified gunsmith work on your firearm.

DANGER

THIS PISTOL IS CAPABLE OF FIRING WITH MAGAZINE REMOVED. INJURY OR DEATH MAY RESULT. NEVER POINT A LOADED PISTOL AT ANYONE OR ANYTHING YOU DO NOT INTEND TO SHOOT.

WARNING

To prevent injury or death, it is imperative that you must keep your firearm unloaded, uncocked and securely locked, with ammunition in a separate location. In addition, take any other reasonable steps to limit the possibility of theft, crime, accident or suicide.

Loading

1. **DANGER:** Always make sure the muzzle is pointed in a safe direction.

2. **SAFETY FIRST:** Never attempt to load or unload any firearm inside a vehicle, building or other confined space (except a properly constructed shooting range). Enclosed areas frequently do not offer a completely safe direction to point the firearm; if an accidental discharge occurs, there is a great risk of injury or property damage.

3. **SAFETY FIRST:** Before loading, always clean all grease and oil from the bore and chamber, and check to be certain that no obstruction is in the barrel. Any foreign matter in the barrel could result in a bulged or burst barrel or other damage to the firearm, and could cause serious injury to the shooter or the others.

Firing

1. DANGER: Keep the muzzle pointed in a safe direction and your finger away from the trigger when cocking any firearm.

2. WARNING: Never carry, handle or leave unattended any firearm which is cocked and ready-to-fire. When cocked, it will fire from slight pressure on the trigger. An accidental discharge could easily result if you fall or drop the firearm, or if the firearm is struck or disturbed by someone or something.

3. WARNING: Never fire any semi-automatic firearm with your finger, hand, face, or other part of your body over or adjacent to the ejection port, or in any position where you may be struck by reciprocating movement of the slide (or bolt). Both the ejection of the empty cartridge cases and the movement of the slide (or bolt) are part of the normal operating cycle of semi-automatic firearms, and pose no safety hazard to the shooter if the firearm is held in a normal grip and fired at arm's length (in the case of a handgun) as intended by its design.

4. CAUTION: Never allow other persons to stand beside you where they might be struck by an ejected cartridge case. The case is hot, and may be ejected with sufficient force to cause a burn, or cut, or injury to an unprotected eye. Make certain there is a clear, unobstructed path for safe ejection of the fired case. Remember, the case may bounce off a hard object nearby and strike you or someone else.

5. DANGER: If while shooting, your firearm develops ANY mechanical malfunction or binding, or "spits" powder, gas, or if a cartridge primer is punctured or a cartridge case is bulged or ruptured, or if the report on firing does not sound quite right, STOP SHOOTING IMMEDIATELY. It may be dangerous to continue. UNLOAD THE FIREARM. DO NOT try "one more shot". Take the firearm and ammunition to a gunsmith for examination.

6. SAFETY FIRST: While shooting any semi-automatic firearm, an unfired cartridge case may occasionally become jammed between the slide (or bolt) and the barrel. Clear the jam as follows, WHILE KEEPING THE MUZZLE POINTED IN A SAFE DIRECTION: remove the magazine, then pull back the slide (or bolt) and hold or lock it to the rear. The jammed cartridge or case now can be removed by shaking it out or by picking it out.

Semi-automatic Pistols

1. SAFETY FIRST: Risk of an accident is greatly increased when any semi-automatic pistol, no matter how safely designed, is carried with a cartridge in the chamber. THIS PRACTICE IS NOT RECOMMENDED AND MAY BE JUSTIFIED ONLY IN CIRCUMSTANCE OF CLEAR AND PRESENT DANGER WHEN THE PISTOL MAY IMMEDIATELY HAVE TO BE USED IN SELF-DEFENSE. By far the safest procedure when carrying a loaded pistol is to leave the chamber empty.

2. SAFETY FIRST: Always point the muzzle in a safe direction when manually operating the slide to load the first cartridge from the magazine into the chamber. Malfunctions which allow the pistol to fire without the trigger being pulled when the slide snaps closed are rare but can happen. Always grip the slide so that your finger, hand, elbow and other parts of your body are BEHIND the pistol and your finger is off the trigger.

Firing mechanism

Taurus PT 24/7 OSS has a striker firing mechanism. It normally operates as a conventional Single Action system e.g. every time the slide cycles it pre-cocks the firing pin.

If an ammunition failure occurs and a misfire happens, the system automatically goes to a double action condition allowing you to fire again by pulling the trigger (double action), with no need to cycle the slide manually.

Safety devices

DANGER:

USE OF SAFETY

1. Your firearm comes equipped with an effective, well designed safety device. HOWEVER, NEVER RELY COMPLETELY ON ANY SAFETY MECHANISM. The best safety mechanism is your own common sense: USE IT! Always handle your firearm as though you expect the safety NOT to work.
2. While handling any firearm, never allow it to point at any part of your body or at another person. No harm will result if you obey this rule, even if an accidental discharge occurs.
3. Leave the safety "on" until you are ready to shoot and the firearm is pointed at the target.
4. Always keep your finger off the trigger and point the muzzle in a safe direction when turning the safety "on" or "off".
5. When applying the safety, be certain to move it fully into position. On some firearms a red warning dot is located beside the safety; when the safety is fully "on", the red dot should be completely covered. Always remember, "half-safe" is NOT SAFE.
6. Never carry any firearm with a cartridge in the chamber without placing the safety "on". (The only exceptions are double-action pistols which have automatic internal safeties and which are not equipped with manual safeties.)
7. For maximum safety never carry a firearm with a cartridge in the chamber.

WARNING

NEVER RELY COMPLETELY ON ANY SAFETY MECHANISM. It is NOT a substitute for cautious handling. NO safety, however positive or well-designed, should be totally trusted. Like all mechanical devices, the safety is subject to breakage or malfunction and can be adversely affected by wear, abuse, dirt, corrosion, incorrect assembly, improper adjustment or repair, or lack of maintenance. Moreover, there is no such thing as a safety which is "childproof" or which can completely prevent accidental discharge from improper usage, carelessness, or "horseplay". The automatic safety can provide only partial protection against mishaps. By itself it is not a complete safety system. To prevent accidents, it is absolutely essential to consistently and correctly use the manual safety lever also. If water, sand, or other foreign matter enters the internal mechanism, the firearm should be dismantled for complete and thorough cleaning. Failure to keep your firearm clean and in proper working order can lead to a potentially dangerous condition.

1) Trigger Safety

This device is designed to preclude the backward movement of the trigger bar so as to prevent an accidental discharge in case the firearm is dropped. The system is disengaged when the trigger is pulled to the rear.

2) Firing Pin Block

The firing pin block, which is designed to prevent the firing pin from going forward and striking the primer, is engaged until the trigger is in its final rearward position. This device is designed to preclude an accidental discharge should the firearm be dropped.

3) Loaded Chamber Indicator

When a cartridge is loaded in the chamber the loaded chamber indicator end protrudes and its red colored surface can be easily seen or felt without the need of moving back the slide.

4) Cocking indicator

A small colored plastic piece is visible at the rear of the slide when the firing pin is cocked.

5) Safety Latch & Firing Pin Decocker

1st position:

Finger off of the trigger, which means that the trigger is in its most forward position. In this position, you can activate the Manual Safety by pushing the lever up placing it in the "ON" position. You can also activate the Firing Pin Decocker by pushing the lever up past the Manual Safety "ON" position. In both stages the trigger will be locked and remain in its forward position. To fire the pistol, push lever down and pull trigger.

2nd position:

After firing, you keep the trigger pulled, which means that the trigger is in its most rearward position. In this position, you can activate the Manual Safety by pushing the lever up placing it in the "ON" position, but you can not activate the Firing Pin Decocker. The trigger will be locked and remain in its rearward position.

To fire the pistol, push lever down and the trigger will move forward and then you can pull the trigger.

6) Taurus Security System

ATTENTION

Never engage the Taurus Security System on your Taurus Pistol with the slide in the open (rearward) position. This will result in permanent damage to your firearm.

Never engage the Taurus Security System when the firing pin is cocked.

Never attempt to engage the Taurus Security System on a Taurus pistol with a cartridge in the chamber.

Proceed as follow:

- Remove the magazine;
- Unload the gun by cycling the slide. MAKE SURE THE CHAMBER IS EMPTY;
- Pull the trigger to decock the firing pin;
- Engage the Taurus Security System;
- You may reinsert the magazine.

Engagement (secure)

Insert the key into the mechanism and turn clockwise until a click is felt or heard. The mechanism now partially protrudes above the surface of the slide. The action is locked in place and cannot function.

Disengagement (ready-to-fire)

To place the pistol in a firing condition, insert the key into the mechanism and turn it counter-clockwise. The mechanism is now virtually flush with the surface of the slide. The pistol can now be fired.

WARNING

Securing your firearm may inhibit access to it in a defense situation and result in injury or death.

WARNING

Failure to properly secure a firearm may result in injury or death.

3. AMMUNITION

3.1 - Use only high quality, original, factory-manufactured ammunition. Do not use cartridges that are dirty, wet, corroded, bent or damaged. Do not oil cartridges. Lubricant or other foreign matter on cartridges can cause potentially dangerous ammunition malfunctions. Use only ammunition of the caliber for which your firearm is chambered. The proper caliber is permanently engraved on your firearm; never attempt to use ammunition of any other caliber.

3.2 - The use of reloaded (remanufactured) hand-loaded, or other non-standard ammunition voids all warranties. Improperly loaded ammunition can be extremely dangerous. Severe damage to the firearm and serious injury to the shooter or to others may result. Always use ammunition that complies with the industry performance standards established by the Sporting Arms and Ammunition Manufacturers Institute, Inc., of the United States, (SAAMI) or the equivalent from other countries.

3.3 - Firearms may be severely damaged and serious injury to the shooter or to others may result from any condition causing excessive pressure inside the chamber or barrel during firing. Excessive pressure can be caused by obstructions in the barrel, propellant powder overload, or by the use of incorrect cartridges or defectively assembled cartridges.

3.4 - Immediately stop shooting and check the barrel for a possible obstruction whenever:

- You have difficulty in, or feel unusual resistance in, chambering a cartridge;
- A cartridge misfires (does not go off);
- The mechanism fails to extract a fired cartridge case;
- Unburned grains of propellant powder are discovered spilled in mechanism;
- A shot sounds weak or abnormal.

3.5 - If there is any reason to suspect that a bullet is obstructing the barrel, immediately unload the firearm and look through the bore. It is not sufficient to merely look in the chamber. A bullet may be lodged some distance down the barrel where it can not easily be seen.

IF A BULLET IS IN THE BORE, DO NOT ATTEMPT TO SHOOT IT OUT BY USING ANOTHER CARTRIDGE, OR BY BLOWING IT OUT WITH A BLANK OR ONE FROM WHICH THE BULLET HAS BEEN REMOVED. SUCH TECHNIQUES CAN GENERATE EXCESSIVE PRESSURE, WRECK THE FIREARM AND CAUSE SERIOUS PERSONAL INJURY.

If the bullet can be removed with a cleaning rod, clean any unburned powder grains from the bore, chamber, and mechanism before resuming shooting. If the bullet cannot be dislodged by tapping it with a cleaning rod, take the firearm to a gunsmith.

3.6 - Do not oil cartridges, and be sure to wipe the chamber clean of any oil or preservative before commencing to shoot. Oil interferes with the friction between cartridge case and chamber wall that is necessary for safe functioning, and subjects the firearm to stress similar to that imposed by excessive pressure.

3.7 - Use lubricants sparingly on the moving parts of your firearm. Avoid excessive spraying of any aerosol firearm care product especially where it may get on ammunition. All lubricants and aerosol spray, lubricants in particular, can penetrate cartridge primers and cause misfires. Some highly penetrative lubricants can also migrate inside cartridge cases and cause deterioration of the propellant powder; on firing, the powder may not ignite. If only the primer ignites, there is danger that the bullet may become lodged in the barrel.

CALIBER	BULLET WEIGHT	MUZZLE VELOCITY
9mm PARA.....	124 GR FMJ	1225 FPS
.40 S&W	180 GR FMJ	985 FPS
.45 ACP	230 GR FMJ	835 FPS
GR = grains		
FMJ = Full metal jacketed bullet		
FPS = Feet per second		

4. OPERATING INSTRUCTIONS

1. To remove the magazine press the **MAGAZINE RELEASE BUTTON**, located near the **TRIGGER GUARD**, with your thumb.

2. Hold the **MAGAZINE** with one of your hands and with the other one insert the cartridges one at a time, pressing them down and to the rear. Insert the **MAGAZINE** into the pistol until it is held by the **MAGAZINE CATCH**. If the **MAGAZINE** is not correctly inserted into the pistol, it can be dropped when you intend to shoot.

3. Hold the pistol with one hand keeping your finger away from the trigger. With the other hand pull the **SLIDE** to its limit and release it, so **SLIDE** will go forward under **RECOIL SPRING** pressure and will insert one cartridge in the chamber.

4. The pistol is now cocked and ready-to-fire in single action. The firing pin spring is compressed and held by the sear.

Once the trigger is pulled, the trigger bar moves and the sear releases the firing pin which moves forward hitting the primer and discharging the ammunition. After the shot, the slide will move back, ejecting the empty case and feeding another cartridge into the chamber from the magazine. The pistol is now ready to fire again. To continue shooting, you must allow the trigger to move until you feel or hear a click and then pull the trigger fully back.

NOTICE: In case of a misfire, i.e., the cartridge primer is hit by the firing pin but the round does not fire, this pistol provides a mechanism that automatically changes the firing system from single action into double action (DA). This allows you to pull the trigger again without the need to cycle the slide.

5. After the last round, the SLIDE will remain in the open position held by the SLIDE CATCH. In order to make it return to its rest position, press the SLIDE CATCH downward just above the LEFT GRIP or pull slide to the rear and let same go forward (you must remove the empty magazine first).

6. If you want to stop shooting before firing the last cartridge of a magazine, push the SAFETY LEVER in the up (on) position or decock firing pin according to page 17 instructions.

WARNING: These Taurus pistols do not have a magazine disconnect (safety). They are capable of firing with magazine removed.

Protect your eyes and ears

Always wear adequate shooting glasses and ear plugs or "ear muff" type protectors whenever you are shooting. Always make certain that persons close to you are similarly protected. Unprotected eyes may be injured by powder, gas, carbon residue, lubricant, metallic particles or similar debris which may emanate occasionally from any firearm in normal use. Without ear protection, repeated exposure to shooting noise may lead to cumulative, permanent hearing loss.

Empty cartridges are automatically ejected from your pistol at a considerable speed and may cause injury to people close to you. The pistol slide moves backwards during the shot. Therefore, keep your face away from the pistol. Do not use double-holding, a condition in which the thumb of the hand not used to hold the pistol stays over the other hand.

5. DISASSEMBLY

1. Remove the **MAGAZINE** by pressing the **MAGAZINE RELEASE BUTTON**.

2. Pull the **SLIDE** to its limit in order to be sure that the chamber is empty and push up the **SLIDE CATCH LEVER**.

3. With the left thumb, rotate the **SLIDE DISASSEMBLY LATCH** clockwise until it stops.

4. With the left hand, pull the **SLIDE DISASSEMBLY LATCH** out of frame. Alternatively release the slide catch, pull back the slide again and push up the slide catch lever. This movement frees the **DISASSEMBLY LATCH**.

5. Carefully lower slide latch and move slide forward up to its normal position. Pull the trigger and keeping it to rear, pull the slide slightly forward until you hear a click. Release the trigger and take the slide out.

6. Release SLIDE SPRING ASSEMBLY from its position on the bottom of the BARREL.

7. Remove the BARREL from the SLIDE by pulling to the front and up.

ATTENTION: No further disassembly is recommended unless done by a skilled gunsmith.

If the slide sticks on the frame, be sure the chamber is empty and firmly pull the trigger fully to the rear while pulling the slide forward off the frame.

If the slide does not move because the barrel remains to the rear and tilted upward, be sure the chamber is empty and push the muzzle against the palm of one hand while pushing the slide forward with the other.

ASSEMBLY

In order to reassemble the pistol, proceed by reversing the disassembling procedure while observing the following details:

1. Replace the barrel in the slide pushing it to the rearward position. Insert the spring/guide rod sub-assembly into the slide over the barrel, compressing the spring slightly to get it into position.

2. The SLIDE should be mounted on the frame and pulled fully to the rear and the SLIDE CATCH must be moved upward to hold the SLIDE to the rear.

3. When reinstalling the SLIDE DISASSEMBLY LATCH, it is inserted into the frame with the lever pointing rearward and the horizontal round portion of the latch must engage the mating surface on the bottom of the BARREL. Insert the take down pin once the slide is in position to line up the barrel with the hole and gently push in. A click will indicate the pin is secured in place.

4. The SLIDE CATCH then can be depressed which allows the SLIDE to go forward.

5. You should cycle the SLIDE several times, with no magazine inserted and no rounds in the chamber, to insure that the barrel / slide / frame relationship is correct.

6. CARE AND MAINTENANCE

WARNING: Be certain the firearm is unloaded before cleaning.

The firearm may be cleaned and lubricated under normal conditions with the disassembly steps described in section 5

- In special conditions, such as repairs, when disassembling is necessary, it is recommended the firearm be sent to a competent gunsmith or the importer.

- In order to keep a firearm in perfect condition it must be kept clean and covered with a slight film of good quality oil to prevent corrosion. This is especially necessary after use.

- For normal cleaning of firearm not used or kept in storage for some time, it is necessary to rub it with a lightly oiled cloth. In the same way proceed with the bore of the barrel. The excess of oil must be removed

- For cleaning after shooting it is of special importance that all residues of powder be removed from barrel and other adjacent areas using an appropriate brush. If particles of lead are detected in barrel they must be scrubbed with a brass brush, drenched with oil. Once cleaned, lubrication should be done as above described.

- Every time you shoot your firearm, it must be cleaned regardless of the number of shots fired. If you shoot more than 200 shots in a day, clean your firearm every 200 shots.

- The magazine also must be cleaned to keep the firearm in good operating condition. The magazine shall be disassembled as follows:

a) Use a punch to press in on magazine spring seat where it protrudes into hole in the magazine floorplate (MAGAZINE BOTTOM).

b) Slide the magazine floorplate toward the front of the magazine, taking care to prevent the forcible ejection of the magazine spring plate and compressed magazine spring.

c) Withdraw magazine spring plate and magazine spring from magazine body. Turn magazine upside down and remove magazine follower.

d) Assemble in reverse order.

SAFETY FIRST: Parts

All firearms require periodic maintenance and inspection which may reveal a need for adjustment or repair. Have your firearm checked by a competent gunsmith annually, even if it seems to be working well, since breakage, improper functioning, undue wear, or corrosion of some components may not be apparent from external examination. If you notice ANY mechanical malfunction, do NOT continue to use the firearm. UNLOAD the firearm and take it to a competent gunsmith immediately.

Our Service Department maintains a full complement of replacement parts for our firearms of current manufacture. Even though most gunsmiths have the knowledge, training and ability to make the necessary repairs to your firearm, the skill and workmanship of any particular gunsmith is totally beyond our control. Should your firearm ever require service, we strongly recommend that you return it to Taurus. Follow the instructions outlined below. Remember, unauthorized adjustments or parts replacement can void your warranty.

It is the responsibility of the purchaser to be absolutely certain that any parts ordered from Taurus are of the correct type and are properly fitted and installed by a competent person. THIS FIREARM IS A PRECISION MECHANISM AND THE IMPROPER FITTING OF PARTS OR IMPROPER MECHANICAL ADJUSTMENT MAY RESULT IN A DANGEROUS MALFUNCTION, DAMAGE TO THE FIREARM, AND POSSIBLE SERIOUS INJURY TO THE SHOOTER OR TO OTHERS. Therefore, the purchaser and/or installer of parts must accept full responsibility for the correct adjustment of and function of the firearm after such installation has been made or attempted.

7. TAURUS SERVICE POLICY

Before shipment, your firearm was carefully inspected and test fired in order to ensure that it conformed to our specifications and standards. Should your firearm require adjustment or repair, we strongly recommend that you return it to Taurus for factory service.

If there is any question regarding the performance of your firearm, please write to our Service Department fully describing all circumstances and conditions involved. If our Service Department makes the determination that your firearm requires factory service, you will be so advised and will be given instructions for the most expeditious handling of your shipment.

Our Service Department will give your firearm a complete inspection, and evaluate the problem (s) specified in your letter. If the work required is not covered under the terms of our "Warranty" (when applicable) you will receive an actual cost quotation, not an estimate. Any charge for repair work must be authorized by you, and no work will be done without your expressed approval.

Please follow these suggestions to expedite service in the United States of America to return any firearm to us for adjustment or repair.

1. Federal law permits you to return your firearm to the manufacturer for service via common carriers. However, state and local firearms laws vary greatly; you should consult your local prosecuting attorney regarding any restrictive laws in your jurisdiction regarding your shipment or receipt of firearms. With the above in mind, it is strongly recommended that any firearm sent to us for repair be sent through a Federally licensed dealer.

2. All firearms must be shipped to us prepaid. **WE WILL NOT ACCEPT COLLECT SHIPMENTS.**

Ship to: Taurus Customer Service, 16175 N.W. 49 Ave., Miami, FL 33014.

3. Be sure to enclose a letter stating your name, address and telephone number, serial number, caliber and barrel length of your firearm. Also state nature of trouble experienced or work required. Merely stating "defective" or "repair as necessary" is inadequate information. Be specific and enclose copies of any previous correspondence. Work (other than warranty repair) will bear minimum labor charge of \$10.00.

4. **FIREARMS MUST BE SHIPPED UNLOADED.** Double check the chamber of your firearm before shipping. If firearms are sent to Taurus in a loaded condition, we are required by law to notify the Federal authorities.

5. **DO NOT** include telescopic sights; custom grips, holsters, or other accessories with any firearm shipped to us.

9. Taurus Limited Warranty

What Does This Warranty Cover?

This warranty covers any service and repair needed by any product manufactured by Forjas Taurus SA., and imported by Taurus International Manufacturing, Inc. or manufactured in the United States by Taurus International Manufacturing, Inc.

How Long Does Coverage Last?

This warranty is of unlimited duration.

What Will We Do?

Taurus will service and/or repair all covered products free of charge.

What Does This Warranty Not Cover?

This warranty does not cover stocks, forends, sights, accessories, cosmetic defects after one year, or damage caused by customer abuse at any time. This express limited warranty is the only warranty on this product. This product is sold "as is" and has no implied warranties of merchantability or fitness for a particular purpose. There are no warranties which extend beyond the description on the face hereof.

How Do I Get Service?

To simplify repair and service Forjas Taurus and Taurus International products are serviced and repaired by Taurus International. Questions regarding the products of either company can be directed to Taurus International in Miami, Florida at 1-305-624-1115 or in writing to:

16175 NW. 49th Avenue
Miami, Florida 33014
in care of the Consumer Affairs Department.

This trademark, forged for over 60 years of hard and dedicated work, became a symbol of quality in hand-guns for civilian, police and military use. This outstanding quality is the result of constant technological evolution and from the devoted work of expert gunsmiths and highly specialized professionals, which makes TAURUS a respected name in more than 75 countries all over the world.
