FEEL THE DIFFERENCE.

2021 PRODUCT CATALOG

FEEL THE DIFFERENCE.

TO OUR CUSTOMERS:

Thank you for taking the time to look through our 2021 catalog. I think we can all agree we are glad to be entering into 2021 after the year we have all experienced. Here at Traditions® we are excited for the new year and to introduce our new products to you! We continue to be focused on innovation and how we can create products that improve your time in the field. As hunters and shooters ourselves, we know how important your time outdoors is and we work hard to build products with that mentality.

Last year we introduced the future of muzzleloading – the NitroFire®. We partnered with Federal Premium® and Hodgdon® on this project and we are so proud of this product. It truly has changed muzzleloading by making it safer, easier, and more reliable. We are honored to have received NRA Publications 2021 Muzzleloader of the Year and Field & Stream's Best of the Best Award along with many other recognitions for this outstanding product. Once you shoot the NitroFire®, you'll truly see the innovation, accuracy, ease of use, and safety that we have consistently been talking about. To learn more about the NitroFire®, go to page 6 and 7. We've also added a new sling that will hold your Firestick™ and allow for easy access in the field.

With a new year, we are introducing the new VAPR™ Twist Barrel. This barrel will be available on the new Vortek StrikerFire® and Pursuit™ XT series and will feature a 1:24" barrel twist. The faster twist will stabilize bullets, increase accuracy, and expand the range of bullet options that can be shot out of these muzzleloaders.

We will also be including the Elite XT™ Trigger system on the Pursuit™ XT and new Buckstalker™ series in 2021. This upgraded trigger was previously available on the Outfitter G3 and NitroFire® so we are thrilled to add it into these muzzleloaders. The Elite XT™ Trigger system has a rebounding hammer, precise trigger pull, and manual cross block trigger safety. Additionally, you can cock the hammer with the manual trigger safety engaged.

Traditions® has a wide range of products including sidelocks, revolvers, Build It Yourself kits, optics, accessories, and more. We have unique firearms like the arrow-launching Crackshot XBR as well as our full line of break action muzzleloaders. We realize the need for quality, reliable products and we work hard to put forth a large variety of options that you can count on. To learn more about our products visit www.traditionsfirearms.com where you can find product information, how-to videos, and more. Be sure to keep us with us on social media and by email where you'll get the latest Traditions information. You can also visit your local dealer or favorite online retailer to learn more about our products.

We can all agree 2020 was a difficult year for everyone and for some more than others. I am excited about the year ahead and wish you health and happiness in 2021. Hopefully we all are able to prioritize more time outdoors and with our family and friends. I appreciate your time and hopefully your business.

Best Regards,
TOM HALL

WHY BUY TRADITIONS

PERFORMANCE, VALUE & QUALITY.

Each year, the Traditions® team works to develop the most innovative & user-friendly firearms. Like you, we are hunters & shooters & understand what you are looking for in a firearm. We continue to take innovation to the next level by developing cutting-edge technology & have been recognized for this innovation with numerous awards and accolades.

TRADITIONS® TECHNOLOGY

VAPR™ TWIST BARREL

The new VAPR™ Twist Barrel provides a 1:24" twist rate, which is a faster twist than the 1:28" that was previously on the Vortek StrikerFire® and Pursuit™ series. The faster twist will stabilize bullets, increase accuracy, and expand the range of bullet options that can be shot out of these muzzleloaders.

TRADITIONS® & ACCURACY.

Traditions® consistently produces some of the most accurate muzzleloaders on the market. Many of our firearms are outfitted with features that provide proven accuracy well beyond 200 yards. You can rely on your Traditions® muzzleloader to be dead on accurate.

LIFETIME LIMITED WARRANTY.

At Traditions®, we believe in the quality, performance & value of our firearms. We stand behind our products & that's why we back all of them with lifetime limited warranties.

SAFETY IS ALWAYS FIRST.

Traditions® has put safety first & foremost when developing our muzzleloaders. Many of our firearms come with a Dual Safety System which is only on Traditions® firearms. You will not see this level of safety on our competitor's guns. The Vortek StrikerFire® & the Vortek StrikerFire® LDR models are outfitted with a trigger block safety & an internal striker block safety. On the Vortek™ Ultralight & Vortek™ Ultralight LDR models a rebounding hammer & trigger block safety are featured. On the popular Pursuit™ G4 Ultralight & Buckstalker™ models they are both equipped with a trigger block safety & internal hammer block safety. Traditions® has made safety standard & a priority in our firearms.

STRIKERE FIRE SYSTEM

No more external hammer! Simply slide the striker button forward until it locks & the rifle is cocked. This system allows for faster lock time, a crisp trigger, the ability to mount your scope closer to the bore & also operate with less weight.

LT-1 ALLOY FRAME

Traditions® LT-1 Alloy Frame reduces the weight of the firearm while maintaining strength & structural integrity. Great for reducing arm fatigue on long hunts, where mobility is crucial.

TAC2™ TRIGGER

The TAC2™ Trigger is the best trigger on any muzzleloader. This clean-breaking, two-stage, creep-free, competition-style trigger is set to be accurate and consistent. It is only available on StrikerFire™ models.

QUICK-T™ RAMROD HANDLE

The Quick-T™ Ramrod Handle functions like a palm saver & a t-handle all in one! The Quick-T™ Ramrod handle is available as an accessory or in a package with the replacement ramrod to fit your Traditions® muzzleloader!

ACCELERATOR BREECH PLUG™

The Accelerator Breech Plug™ removes easily by hand in just three full turns. To clean your muzzleloader or remove a load from the barrel, simply twist the breech plug three full rotations & it's out! The Accelerator Breech Plug™ makes use of a new flat face for even more consistent ignition & a heavy-duty O-ring that eliminates blow back.

DUAL SAFETY SYSTEM

Incorporates two safeties, making equipped break actions some of the safest muzzleloaders available. The trigger block safety is the most apparent as it is positioned on the trigger guard, like many centerfire rifles. The second safety is an internal hammer block safety that prevents the hammer from engaging the firing pin unless it has been manually cocked. The combination of these two safety systems allow you to break open the rifle & remove your live primer without having to depress your hammer.

PREMIUM CERAKOTE COATING

Premium CeraKote Coating is 50x more corrosion resistant than stainless steel barrels. The Premium CeraKote Coating on both the barrel & frame was designed to provide a high quality, long lasting coating, with high corrosion protection & durability.

SPEED LOAD SYSTEM

(Pursuit™ & Buckstalker™ models only) This system allows for a bullet that is perfectly centered with the barrel rifling, allowing you easier bullet starting & more consistent groups.

NITROFIRE[®] TECHNOLOGY

ELITE XT™ TRIGGER

The NitroFire[®] is equipped with Traditions[®] Elite XT™ trigger system. The Elite XT™ trigger system is designed with a rebounding hammer and a manual cross block trigger safety. The Elite XT™ trigger allows the action to be broken open with the cross bolt safety engaged which allows you to insert or remove your Firestick™ and view the chamber.

FEDERAL PREMIUM[®] FIRESTICK™

CONSISTENT, ACCURATE SHOTS

The Firestick™ is factory-manufactured and precision-measured so it will have the exact same load based on the selected powder charge every time. No inconsistency and no more wondering about how many pellets or grains you should use. Consistency leads to reliable accuracy. You'll be using the exact load that is recommended for your NitroFire[®]. The system delivers convenience too. No hassles of pouring powder or playing with pellets. And, once you've shot your NitroFire[®] muzzleloader, simply throw away the used Firestick™.

CLEANER & CLEAN BURNING

The NitroFire[®] muzzleloader does not have a breech plug. You no longer have to remove your breech plug and make sure the fire channel is clear. There won't be inconsistency due to fouling in your breech plug. This allows for increased accuracy and improved reliability. The Firestick™ is loaded with cleaner-burning Hodgdon Triple 8 powder which will provide less fouling compared to other powders on the market.

SAFETY IS A #1 PRIORITY

Traditions[®] has always made safety a priority. The NitroFire[®] muzzleloader incorporates the Firestick™ system which eliminates accidentally overcharging the firearm. Only one Firestick™ can fit into the breech and since it is pre-measured all of the guesswork has been removed. The NitroFire[®] can easily be uncharged when crossing a fence, climbing into a treestand, or getting into a vehicle.

MOISTURE? NO PROBLEM!

The Firestick™ is impervious to moisture so there is no longer a worry about powder becoming inert due to condensation or weather. You can rely on the Firestick™ inside your NitroFire[®] muzzleloader to remain consistent every time no matter what Mother Nature throws at you. Any unused Firestick™ can also be stored for later use.

FEDERAL PREMIUM
FIRE STICK
Loaded With:
HODGDON
THE BRAND THAT'S TRUE

WHERE THERE'S SMOKE, THERE'S NITROFIRE[®]

Traditions[®] has been a leader in the muzzleloading industry for years with their innovation. Now, the future of muzzleloader is here with the NitroFire[®] muzzleloader. The NitroFire[®] is the only muzzleloader on the market that uses the NEW Federal Premium[®] Firestick™. Traditions[®] has teamed up with Federal[®] and Hodgdon[®] to change muzzleloading forever with this revolutionary new platform. The Firestick™ is an encapsulated powder charge containing Hodgdon Triple 8 granular powder. It provides better consistency, improved reliability, increased safety, and is impervious to moisture. This encapsulated powder charge is available in different pre-measured charges. Simply load your bullet from the muzzle and seat it on a shelf within the barrel. This shelf provides a consistent seating point for the bullet. Break open your NitroFire[®] and insert your Firestick™ into the breech. Once inserted, place a 209 primer into the primer pocket of the Firestick™ and close the action. Your NitroFire[®] is now loaded and ready to go! Traditions[®] NitroFire[®] muzzleloader helps to make muzzleloading safer, easier, and more consistent. Join the NitroFire[®] revolution!

DEERHUNTER™

It doesn't matter your level of experience, the Deerhunter™ will fit your needs. It has been designed to be lightweight, easy to shoot & incredibly accurate for a very modest price. This rifle has a 24" octagonal barrel with the choice between a rugged synthetic or wood stock. The Deerhunter™ is designed to shoot full bore sized bullets, saboted bullets & patched round balls accurately. Sitting on top of the rifle are adjustable Williams™ metal fiber-optic sights that give you pinpoint accuracy in regular or low light conditions.

PA PELLET™ ULTRALIGHT

Traditions® PA Pellet™ Ultralight is a game changer for your Flintlock season! Based off the popular PA Pellet™ Flintlock, the barrel is made of a premium grade Chromoly steel, which is typically found on centerfire rifles. This material makes the barrel extremely strong, lightweight, & accurate. The 1:28" twist allows you to fire saboted bullets & modern muzzleloading projectiles. Additionally, the outside of the barrel has Premium CeraKote Finish which will help protect against rust, corrosion, and weather.

CROCKETT RIFLE

The Crockett Rifle, based off "Old Betsy" is the perfect small game gun. This half-stocked .32 caliber is authentic in look & feel. Featuring brass inlays, percussion lock & octagonal barrel, this gun is perfect for at the range or in the field.

R2390801

HAWKEN™ WOODSMAN RIFLE

Hawken™ Woodsman is a serious hunting rifle. The Woodsman has the classic styling & handling of the time-honored Hawken™ while offering great performance & affordability. Both the percussion & flint models boast a hooked breech for easy barrel removal, click-adjustable rear hunting sight, double-set triggers in an oversized glove-fitting trigger guard with finger rest & an inletted solid brass patch box.

R2090C

PENNSYLVANIA RIFLE

This historically accurate rifle, holder of the enviable status of "authentic for re-enactment use" from the American Revolutionary Brigade, recreates the finest features of the classic long rifles. In flintlock & percussion models, it features a full length walnut stock with cheekpiece, solid brass patch box, stock inlay ornamentation & toe plate. Double-set triggers. Adjustable primitive-style rear sight. Custom detailing throughout, without custom cost.

R9250801

MOUNTAIN™ RIFLE

Based off of a Jacob & Samuel Hawken design, the Mountain Rifle was the inseparable companion of fur trappers & American explorers alike. Part of the "plains rifle" family, the Mountain Rifle could be found on the horsebacks of fur trappers looking for beaver & other pelts thanks to its long barrel which enabled this rifle to take targets at longer distances. While the original had a rust brown finish on the barrel, Traditions has selected a Brown CeraKote Finish which replicates this finish while providing increased corrosion resistance. The Patch Box, custom scrolled trigger guard, & many other features make this a gun you'll want to add to your collection.

P1060

KENTUCKY PISTOL

A classic American pistol, the Kentucky was a must have for American Pioneers & early 19th Century Explorers. The Kentucky was made famous by the battle of New Orleans & favored by Davy Crockett. It was a favorite because of its one piece stock with superb balance & features like a birds head grip, fixed sight, case colored sidelock & brass ramrod thimbles. The Kentucky will please both the collector & novice alike. Whether you are a die hard or just a weekend enthusiast your fully functional Kentucky will meet your needs.

P1100

TRAPPER PISTOL

Most of the early mountain men & traders carried a single-barreled pistol & they were popular for years. These pistols had proven themselves reliable, & that was of great importance to a trapper who might have to stake his life on a pistol's ability to provide a back-up shot in what could be a desperate situation. The Trapper pistol's primitive-style adjustable rear sight, octagonal barrel & double-set triggers (capable of firing set or unset) allow you to predictably put your shots on target.

R184200

1842 SPRINGFIELD MUSKET RIFLE

Used during the 19th century, the 1842 was the last US smoothbore rifle. It was the first US musket to be produced with a percussion lock and was superior to the flintlock since it was more reliable and resistant to weather. This rifle was used during the American Civil War.

R185303

1853 ENFIELD MUSKET RIFLE

The 1853 Enfield was used in the Civil War by both the North and the South. The Confederates imported more of these guns during the war and towards the end of the war, more than 75% were armed with the 1853 Enfield. It was the second most widely used rifle behind the 1861 Springfield Musket. The original (as with this reproduction) has a 39" barrel and was fastened to the stock with 3 metal bands. This model is also known as the "three band" model.

R186100

1861 SPRINGFIELD MUSKET RIFLE

The most widely used rifle during the Civil War, the 1861 Springfield was a favorite due to its reliability, accuracy, and range. The 40" barrel and .58 caliber allowed for an effective range of 200-300 yards. While difficult to find during the early Civil War years, it became the first rifle produced at such a large scale and its popularity continues today.

R186306

1863 ZOUAVE MUSKET RIFLE

The 1863 Zouave rifle was originally produced by Remington Arms under a contract with the US Government. Very few models actually saw action during the Civil War and none were distributed to any army division. However, the Zouave was created to put a more maneuverable firearm into the hands of soldiers and along with its barrel strength it was also prized for its overall beauty. The patch box additionally allowed for storage.

CANNONS

Traditions® Cannons are fully operational & accurate in scale & detail. These are perfect for shooting especially around Memorial Day & the 4th of July. Available in a variety of styles & plating, these cannons are sure to be a fun tradition for you for years to come!

1. NAPOLEON III & 5. MINI NAPOLEON III

Reminiscent of the cannon used by the armies of both the North & South during the Civil War. Built in two sizes, each featuring metal-rimmed wheels. Offered in large scale .69 caliber with authentic accessories & .50 caliber mini version.

2. MINI OLD IRONSIDES

British guns proved no match for the deck guns of the U.S.S. Constitution. Our replica features authentically-styled naval carriage & barrel.

3. YORKTOWN

Field artillery came into its own during the American Revolution, notably in General Washington's victory at the Battle of Yorktown. This faithful model features the split-trail carriage that gave our army mobility.

4. OLD IRONSIDES

This model is nearly three times heavier than its' little brother. This .69 caliber has the look & feel of a working piece of artillery.

6. MOUNTAIN HOWITZER

The Mountain Howitzer will be a great addition to any Civil War enthusiast's collection! This mini cannon is reminiscent of the larger version used during various wars but notably during the Civil War. Our replica is smaller, lighter, & fully functional.

STARTER & BLANK PISTOLS

COMPETITIVE STARTER GUN FIRES 209 SHOTGUN PRIMERS.

A blank pistol with the strength to stand up to frequent use & for those who prefer a larger, more hand-filling pistol. This deluxe blank pistol has the heft & balance of many conventional pistols. A solid barrel with a red plug identifies that the barrel is safe & is not a real gun. The cylinder swings out for loading the five (5) 209 shotgun primers. Comes in a handy plastic, foam lined storage & carrying case.

BP6001	Metal	\$119.46
BPC6001	Metal / Clampack	\$123.95

314 STARTER GUN 6MM & .22 CALIBER CRIMPED

A real value in a light duty 6mm caliber blank gun. The styling & heft make this starter gun handle like a conventional cartridge revolver. Made up of a solid barrel with a red plug to identify that it is a safe barrel. Loads seven (7) crimped 6mm acorn blank cartridges. Double & single action.

BP6000	Composite	\$74.49
BPC6000	Composite / Clampack	\$78.95

SNAP CAPS

Snap caps are made to protect your firearms by relieving the stress on your firing pins & firing pin springs. When you safely store your unloaded gun, put a snap cap in the chamber & fire your gun to allow the firing pin to lay at rest. This will help prevent firing pins from breaking in the future.

Snap caps are also a great tool to practice dry firing your guns to teach safe gun handling, improve your shooting skills & tune your trigger.

BLACK POWDER REVOLVERS

YANKEE REVOLVERS

Union Army soldiers relied on many different types of sidearms for short range & close quarters combat. The revolver was unique in that it had the ability to fire several rounds per minute before having to reload. Revolvers were typically issued to officers & mounted soldiers, however some were purchased privately or found on the battlefield by infantryman. The 1851 Navy Revolver is distinguished by its octagonal barrel & lever style loader. The 1851 helped to begin both the expansion of the West & the Civil War. The 1851 Navy is commonly considered to be one of gunfighter "Wild Bill" Hickok's favorite handguns.

REBEL REVOLVERS

Although the resourcefully equipped Confederate soldier could not compete with Union repeating rifles, it was a different story when it came to revolvers. These handguns did not typically require special ammunition, making them easy for Southern troops to acquire & operate.

1858 NEW ARMY REVOLVERS

Designed to be the future of revolvers, the top strap, full frame design made the 1858 New Army Revolver one of the strongest available. During the Civil War, its 8" barrel (with the exception of the 1858 Bison Revolver) & reliability made it highly sought after.

1860 ARMY REVOLVERS

Recognized as the mainstay of the Union Army, the 1860 was ordered to fill the ranks. The .44 caliber revolver was as powerful as it was popular. After the Civil War, 1860 revolvers could long be found in Army posts & across the Frontier.

The XBR™ upper features an inner barrel which you slide the hollow end of your Traditions® Firebolt™ 2216 aluminum arrow over until it reaches the end of the barrel. The inner barrel is protected by an outer shroud. Simply load your arrow, break open the action, and put in a .27 caliber Traditions® XBR™ Powerload. Continue by closing up the action, taking the safety off, cocking the hammer, and firing at your target. You'll experience increased accuracy thanks to the arrow being pulled from the front and this rifle has roughly a decibel of 85. With up to 385 FPS, this package is excellent for adults, youth, and anyone who may be disabled.

CRACKSHOT™

Tradition's popular Crackshot™ rifle is a single-shot cartridge rifle perfect for small game hunting & plinking. Weighing just over four pounds, this gun is lightweight & easy to carry. It is available in .22 caliber. The Crackshot™ has many great features that make this gun easy to use. The rifle has an extractor built in so removing the blank is simple. The manual trigger block safety allows the rifle to be safe & the checkered forend provides a better grip. The takedown feature allows you to remove the front sling swivel stud to take off the forend & remove the barrel. This feature allows the rifle to break down when needed!

CR220070

MAIN FEATURES:

- + Available in .22 caliber.
- + Rubber Recoil Pad.
- + Extractor.
- + Manual Trigger Block Safety.
- + Integral Scope Mount.
- + Great for plinking & small game hunting!
- + Great Truck Gun!
- + Lightweight & easy to carry.

EASY TAKEDOWN:

All models now come equipped with an easy takedown feature. Simply unscrew the sling swivel stud to remove the forend which then allows you to remove your barrel from the frame.

BULLETS

USED BY THE PROFESSIONALS:

SMACKDOWN® BLEED™ BULLETS

With absolutely devastating impact, this bullet creates massive wound cavitation upon hitting an animal. It delivers traumatic force & provides the shooter lower recoil & faster velocities than other bullets on the market. It is lead free & CA compliant. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. Perfect for whitetail deer, small plains game, predators, & hogs.

SMACKDOWN® XR™ BULLETS

Xtreme Range is the name of the game for this bullet. With a high ballistic coefficient, this projectile shoots flatter while maintaining accuracy & hits harder due to the PC tips which maximizes expansion for optimal terminal performance. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. This bullet is perfect for small plains game, predators, elk, & whitetail.

SMACKDOWN® CARNIVORE™ BULLETS

This bullet delivers bone crushing performance on big game & shoots flat with precision accuracy. The polycarbonate tip maximizes expansion without sacrificing weight retention. The new & improved Ridgeback™ Sabot has horizontal ribbing & a deeper cup & additionally provides a better gas seal, easier loading, & improved accuracy. This bullet is the choice for elk, large plains game, whitetail, bear, & moose.
